American Chemistry Council - Diisopropyl Ether Revised Test Plan

To Whom It May Concern:

On March 6, 2006, the American Chemistry Council Isopropanol Panel Diisopropyl Ether Task Group (DETG)¹ submitted for review and public comment its revised test plan for Diisopropyl Ether (CAS # 108-20-3) under the Environmental Protection Agency's High Production Volume (HPV) Chemical Challenge Program.

In December 2007, the DETG received comments from EPA on the test plan and robust summaries. No other stakeholders submitted comments.

The DETG appreciates the efforts of EPA in preparing comments and is reviewing the recommendations presented in the comments. The DETG will carefully consider those recommendations and how they may enhance the existing test plan.

If you have any questions or comments, please feel free to contact me at (703) 741-5607 or via email at Sarah_McLallen@americanchemistry.com.

Sincerely yours,

Sarah C. L. McLallen
Manager, DETG

¹ The DETG is organized under the American Chemistry Isopropanol Panel. Members of the DETG include: ExxonMobil Chemical Company and Shell Chemical LP.
